

LaserPin

PIN CYLINDERS

Laserpin is leader in providing spare parts for the microperforation: pin cylinders, perforation rollers and counter rollers.

Laserpin constantly gives the uttermost care in supplying its customers with high quality components and equipment.

When it comes to Micro Perforation, the components which need to be changed regularly, are the pin cylinders.

We provide our customers with a wide range of cylinders for every need. We supply all sizes, materials and pin densities requested by the market.

Additionally we offer a complete solution, including the replacement of the perforation roller and of the counter roller.

The counter rollers are usually made of natural fiber or rubber. We also have in stock rollers of other materials such as nylon.

We guarantee a fast delivery of the spare parts worldwide.
